## Desperado Gives Self Up Tuesday

PADUCAH, Ky. (U.P.)—Gunman Carl Burton, 24, wanted for kidnapping a Missouri state trooper, surrendered meekly to authorities last night.

Carl Burton, 24, wanted for kidnapping a Missouri state trooper, surrendered meekly to authorities last night.

Burton, his hands held over his head, walked into police headquarters and told authorities: "Here I am. I give up." Later, he added, "I'm glad it's all over."

The gunman was arraigned immediately after his surrender.

At issue is the question of whether the victim's fatal wounds came from a shotgun blast fired by Missouri state trooper Vernon Hopkins, or from a rifle fired by Forrest McAllister, a Fulton, Ky., insurance salesman who had been stopped at the roadblock a few minutes before Miss English's car drove up.

Also unsettled is the question of whether either man had the authority to shoot.

Davis said Tuesday that a pathologist reported that Miss English's death apparently was caused by "high caliber missiles." He said he found no buckshot in her body.

Mrs. Byron McAllister, mother of Forrest McAllister, said she refused to accept the call because she would not identify herself and the switchboard operator cut him off when he attempted to go ahead despite her refusal.

She said her son "thought he was doing his duty" at the time of the shooting.

## Russia To Land Jet Airliner In The U.S. Today

WASHINGTON, Feb. 4 (U.P.)—Russia will stage a new display of air prowess Thursday when it flies the new Soviet ambassador here in a jet airliner.

The State Department said the giant Tu-104 carrying Ambassador Mikhail A. Menshikov is scheduled to land at 4 p.m. e.s.t. at Friendship Airport, midway between Washington and Baltimore.

The landing will give the Russians another chance to show off the 500-mile-an-hour plane on which they are staking claim to supremacy in the jet passenger field. The United States has no scheduled commercial jet airline flights.

Friendship Airport was chosen for the landing because it has a runway long enough for the big jet, which requires about 8,000 feet or more to land and take off. Friendship's longest runway is 9,450 feet. The long, close-runway at Washington's National Airport is 8,740 feet.

Idlewild Airport in New York has barred landings by the Russian and all other jet planes on grounds they are too noisy.

The Tu-104 made its first flight to the United States last September when it brought Foreign Minister Andrei A. Gromyko to this country to attend a session of the United Nations General Assembly. At that time, two of the planes landed at McGuire Air Force Base, N.J.

The Air Force's Military Air Transport Service will assign a radio operator, a navigator and pilot to the Soviet jet to pilot it through American "air space." The three-man U.S. crew will board the plane at Gander, Newfoundland, officials said.

Police examine a collection of some 20 pistols, rifles and carbines. Arsenal was taken from the Granzig apartment.

Henrietta all shook up. Dr. Granzig after ruckus.

PRESIDENCE LEAD—Dr. W. F. Granzig, physician of Niles, Ill., a Chicago suburb, is under police care after a wild three hours during which he shot up his apartment and terrorized his wife Henrietta. Mrs. Granzig managed to escape, and the doctor spurned shouted and telephoned demands that he take his medicine. Finally tear gas got him. (International)

## Navy Vanguard Failure Again

By WILLIAM TUCKER  
United Press Staff Correspondent  
CAPE CANAVERAL, Fla. (U.P.)—The Navy's jinxed Vanguard rocket finally struggled into the sky early today but it faltered and broke in two after a one-minute flight and had to be destroyed.

The new Navy failure sent several million dollars worth of clinders tumbling into the Atlantic. It left the freshly launched Vanguard satellite in orbit around the Vanguard. Another rocket is ready. But the study of what happened to today's will undoubtedly delay it.

Still hopeful, a Navy spokesman in Washington said: "We've got more to do. We're learning all the time."

It was estimated that the rocket, believed to be carrying a simple form of life in its satellite, rose to between 10,000 and 20,000 feet, less than four miles, before it hung in the sky, broke into two fiery pieces and began falling back. It was then blown up from the ground one minute after launching.

John Hagen, director of Vanguard project, exclaimed "Oh, no!" when informed in Washington of the sputtering flight. It was the second actual launching failure of the full rocket assembly.

The Vanguard rose laboriously almost enveloped in its ground exhaust and climbed very slowly into the clear but almost freezing Florida pre-dawn. It seemed to hang for a moment at modest altitude, broke into two fiery pieces and was blasted to bits.

Sources here said it would be impossible to determine what happened until telemetry of the mission is studied on the ground. This might not be before another day or so, they said.

However, it was believed that the missile broke in two at the joint of the first and second stages well short of the time they were supposed to have separated in the rocket's normal course toward an orbit.

Veered To Right  
The missile was seen to veer slightly to the right just before it broke. It was known that the Cape Canaveral range safety officer, Lt. Col. R. D. Stephens in the central control building, pushed the "destroy" button after the missile broke in two.

Two plumes of flames were seen falling into the ocean several miles out from the tip of Cape Canaveral. It was not determined whether these were caused by the impact of the main parts of the missile or smaller fragments.

## Tax Cut May Be A Reserve Weapon, Ike

WASHINGTON, Feb. 5 (U.P.)—President Eisenhower said today that a tax cut might be an administration reserve weapon if an upturn in the economy fails to develop.

The President, speaking hoarsely and showing the results of a cold and sore throat, said, however, that he still expects an economic upturn about the middle of the year, or possibly just a bit later.

Under questioning, he added that a tax cut could be a reserve weapon if the economic "knockout" does not take place as expected.

This was the President's second news conference since late October. He opened today's conference by asking reporters to make their questions long, so he could answer with either a yes or no and thus save his ailing vocal chords.

The President said that aside from his hoarseness he felt well and had no other symptoms of "flu." The White House had reported Tuesday that he had a "slight cold" and a "slight throat."

He said he thought it was to be expected that there would be a seasonal decline in the winter months, lasting through March. But as spring and summer came on, he said, he expects freer credit and other economically encouraging steps by the government and the business community to bring about an upturn—about or after the middle of the year.

A reporter jumped up immediately to ask the croaky-voiced President whether a tax cut might be a reserve weapon of the administration if the upturn did not take place or was unduly delayed.

The President answered flatly that a tax cut could be such an economic reserve weapon and certainly would have an invigorating effect on business. He said, however, that a final determination was some distance away.

## Stubblefield Is Candidate For Gregory Seat

Frank A. Stubblefield, Democrat of Murray, announced his candidacy for the office of United States Representative from the first Congressional District of Kentucky today.

Stubblefield's candidacy will be subject to the will of voters at the Democratic primary in May.

Mr. Stubblefield, at present serving the third year of his second term as Railroad Commissioner from the first railroad district in Kentucky, is a partner in the drug firm of Dale and Stubblefield, Murray.

A graduate of the University of Kentucky with a BS in Commerce, he is also a veteran of World War II, serving in the Navy as a Lieutenant (jg) gunnery officer in convoy duty with the Armed Guard, Atlantic.

A former director of the Murray Chamber of Commerce and a former member of the Murray city council, he is a

Frank A. Stubblefield

member of the American Legion, the Veterans of Foreign Wars, Elks, and is a member of the Methodist Church. He is married to the former Odessa Bazz of Mayfield, and the Stubblefields have three children: Jennifer Sue, 19; Frank, 15, and Molly, 5.

Stubblefield is the second person from Calloway County to file for Congress, a position now held by Noble Gregory of Mayfield. John Pasco, local engineer has also filed for this office.

## Five Youths Admit To Breakins

Five Calloway County youths have admitted to breaking and entering several cabins on Kentucky Lake and to two dwelling houses in the county, according to county officials.

A hearing will be held on February 18 at 2:00 p.m. in the chambers of County Judge Wayne Hayburn.

County Sheriff Cohen Stubblefield has a large amount of loot in his office which was found in a shack near the lake.

## New Detection Lung Cancer Is Now Possible

BALTIMORE, Md. (U.P.)—The American Cancer Society said today that a Johns Hopkins University medical team has developed a method of early detection of lung cancer by having a patient cough up lung secretions that can be examined for malignant cells.

Dr. Philip Whittlesey, one of the developers of the technique, said he used it whenever possible on patients suspected of having lung cancer but that it was not yet feasible as a general health measure for everyone. Whittlesey said that the time required to screen the exfoliated cells in the process is so great that it would require an army of technicians to keep up with the work.

The technique calls for the patient to inhale a small quantity of sulfur dioxide gas, which is slightly irritating to the interior surfaces of the lung. This causes the lung to secrete sputum which is coughed up by the patient within minutes.

Sneakers of the sputum are examined under a microscope and the presence of cancer, if any, is easily detected. The new technique was developed by Whittlesey, Dr. Ward B. Altan, Dr. Lulu M. Haroutinian and Miss Elizabeth D. Kelley.

## Weather Report

By UNITED PRESS

Southwest Kentucky — Cloudy and warmer with occasional light rain and drizzle today and tonight. High today in upper 40s, low tonight low 40s. Thursday cloudy with occasional rain, high in mid 40s.

Some 5:30 a.m. temperatures: Bowling Green 37, Paducah 41, Covington 34, Hopkinsville 37, Louisville 35, Lexington 33 and London 31.

## Assembly Takes Day Off After Passing First Bill In 4 Weeks

By JAMES R. RENNEISEN  
United Press Staff Correspondent  
FRANKFORT, Feb. 5 (U.P.)—The General Assembly took a day off today after passing its first measure in more than four weeks of sessions.

The House and Senate completed action Tuesday on H.R. 22 which appropriates \$1500 per day to pay the salaries of the 121 employees of the legislature.

A large number of the legislators were spending the day visiting the huge General Electric plant at Appliance Park near Buechel in Jefferson County. The junket will not be entirely divorced from their legislative activities.

The General Electric Co. regularly supplies a considerable number of information bulletins to House and Senate members praising "right to work" legislation which would outlaw the union shop.

Labor union leaders in Louisville plan to combat any anti-union influence exerted by General Electric today by outfitting union members at the GE plant with distinctive headgear.

The some 3,000 union members in the plant were to wear paper hats bearing the legend, "Beware of the Right to Work Fraud" when the senators and representatives tour the GE facilities.

The administration forces seemed to have gained control

## Heart Surgery Believed To Be Success

Mrs. J. R. Williams is reported doing nicely following major heart surgery at the Grace Hospital in Detroit, Michigan.

Williams the former Robbie Mae Broach of Murray and daughter of the late Robert Broach and Mrs. Myrtle Broach of Murray, has been suffering from a heart condition for several years and recently it became critical. One valve in her heart being completely closed.

The operation according to doctors in the Grace Hospital was successful and barring complications a complete recovery is expected.

Mrs. Williams is also the daughter-in-law of Mr. and Mrs. L. D. Williams, 110 Sycamore street, Murray.

Mrs. Williams is in Corridor No. 122, Grace Hospital, Detroit, Mich.

## He careth for you.

I Peter 5:7.  
We are only beginning to understand the minute  
care the Infinite takes to preserve our physical health  
and well being. The book "The Wisdom of the Body"  
explores the super intelligence that directs the infin-  
ity of organs and cells of the body. God wants to di-  
rect our lives in all ways and we should commit our  
ways to him daily and eagerly accept his care and  
direction.

## Ten Years Ago Today

Ledger & Times File

Murray High School's Tigers swept over the Fulton  
Bulldogs two games played on the Murray hardwood  
last night.

Mrs. Mason Ross, Registered Nurse, has returned  
from Louisville where she was a delegate from the fifth  
district of Kentucky State Nurses Association at a special  
meeting of the group last week.

The thirteenth annual Purchase Pennyrite basketball  
tournament will get under way at the Murray College  
gymnasium tonight at 7:30.

## RAYBURN IS RIGHT

Sam Rayburn of Texas, 76-year-old Speaker of the  
House of Representatives says our leaders underesti-  
mate Americans.

In an interview in Ledger and Times Rayburn says  
the people are thoroughly capable of understanding  
what goes on in the world, and our federal authorities  
make a mistake by trying to shield them from realities.

In answer to the direct question: "what troubles you  
most as you look at America today?" Rayburn said with-  
out hesitation: "timid leadership."

"It is a strange thing that Americans become panic-  
stricken when the Russians launch a satellite within less  
than a month after the Nautilus, first atomic-powered  
submarine, travelled 1,32 miles underneath the polar  
ice-cap without even making the head-lines in most Amer-  
ican newspapers.

The electric power industry had set aside the fateful  
week in October when Sputnik I was launched to turn  
on the heat at the first atomic-powered commercial elec-  
tric plant in the world at Shippingport, Penn.

It attracted very little attention although it is now  
producing enough electricity to supply a city of 120,000  
people and all sky-scrapers and other buildings in down-  
town Pittsburgh now use electricity from the Shipping-  
port plant.

It is difficult to successfully "lead" folks like Ameri-  
cans, but what Speaker Rayburn means is that some  
could do a much better job than those now in control of  
our federal government.

What we need is somebody who can make us proud  
of what we are doing. One of our local ministers men-  
tioned Sunday we need to sing: "God Bless America" in  
this space age. We learned it in World War Two. Let's  
not forget it.

## TROOPS NEEDED IN BROOKLYN

The third teen-age school girl was attacked at the John  
Marshall Junior High School in Brooklyn Thursday.  
The principal of the school killed himself early this  
week after declaring: "I can take no more. A woman  
teacher has been badly beaten, and colored boy gang-  
sters have threatened others.

Violence in this one Brooklyn school is more than the  
total in all public schools in the South in the last two  
years; yet the school board has refused even to assign  
a city policeman to the school to maintain order. Why?

Can it be that federal troops can be used only to pro-  
tect the rights of negroes such as the nine students at  
Little Rock, who insist on attending Central High School?  
And can school patrons in Brooklyn be blamed if  
they boycott public schools until their children are given  
police protection?

We read in one of the state papers the other day that  
unless something is done about the shameful violence in  
Brooklyn there is the ever-present danger of "Brooklyn-  
ites acting like Brooklynites."

What is meant was that Brooklynites are not particu-  
lar about wreaking vengeance only on guilty persons  
once their passion is aroused.

Some of the most serious race riots in the United  
States have occurred in Brooklyn, and when one starts  
guilt or innocence has little to do with a person's safety.  
The color of his skin is the only thing that counts in the  
sort of riots they have in Brooklyn, Detroit, or Chicago.

We will never understand why white children are not  
given the same protection in Brooklyn that President El-  
senhower insists on colored children having in Little  
Rock.

What it all adds up to is that the negro vote is more  
important than the rights of children, whether they be  
white, or colored. Also that when we sow the wind  
we will reap the whirlwind.

## Loss Of Pioneer Spirit Is Big Lack Today, Scientist

By LOUIS CASSELS

United Press Staff Correspondent  
WASHINGTON — Dr. Detlev W. Bronk, president of the  
National Academy of Sciences, is too polite to accuse anyone of  
laziness.

He went to great lengths to  
find synonyms for that ugly  
word: when he answered the  
question which the United Press  
asked of six prominent Ameri-  
cans:

"What troubles you most as  
you look at America today?"  
"I think," said Bronk, "that  
we are in danger of losing the  
zeal for creating new things, for  
opening new frontiers, that has  
been our greatest national asset  
since the pioneer days."

"We are putting too high a  
premium on comfort and too  
low a premium on creativity.  
We need to rediscover the fun  
and satisfaction of working  
hard."

Leads Busy Schedule

Bronk is a small, intensely  
energetic man who has won  
distinction both as a scientist  
and as an educator. He formerly  
was president of Johns Hopkins  
University. Today, in addition  
to heading the National Academy  
of Sciences, he serves as director  
of the Rockefeller Institute,  
chairman of the board of the  
National Science Foundation, and  
a member of President Eisen-  
hower's top-level Science Ad-  
visory Committee. All these re-  
sponsibilities keep him on the  
run seven days a week, but he  
thrives on it.

Bronk shudders visibly when  
you mention that U. S. industry  
may be headed for a four-day  
work week. He feels that no na-  
tion, locked in a cold war  
for survival, can afford such a  
prodigious waste of manpower.

"But I don't blame factory  
workers for seeking shorter hours  
at jobs that are dull and monotonous," he quickly added. "I  
realize that the fellow who is  
tightening bolts on an assembly  
line doesn't get the same sort  
of satisfaction out of his work  
that a scientist does."

"One of the big challenges  
facing our society is to find  
ways to restore a sense of per-  
sonal craftsmanship and cre-  
ativity to industrial jobs."

In past generations, Bronk said,  
the "lash of economic neces-  
sity" kept America's creative  
spirit alive. But Americans today  
are tempted to think that we've  
got it made, that we can all  
sit down and live off the fat of  
our past scientific, economic  
and cultural achievements.

Will fear of Russia's scientific

progress serve as a substitute  
"lash" for renewed American ef-  
fort?

Fear No Motive  
"I would be greatly disturbed  
about the future of our country  
if we had no motive for hard  
work except fear," he said.

"Fear is not an adequate  
stimulus for a great country.  
A wholesome awareness of the  
danger we are in can be a  
useful spur. But I've learned  
from my history mountain-  
climbing — that fear is much  
more likely to paralyze a man  
than to keep him moving up-  
ward."

How great is our danger? Are  
we falling behind the Russians  
in scientific development and  
weapons technology?

"There's no pat answer to  
that. They are more competent  
than we are in some areas of  
science, and we are ahead of  
them in others. It would be  
juvenile to assume that we  
would always make every im-  
portant scientific discovery first.  
"Whatever our relative streng-  
ths at the moment, it is clear  
that they have been developing  
their military potential at a  
faster rate than we have, and  
as long as that is true, we  
certainly have no grounds for  
complacency."

## N. Y. TREE OFFER

ALBANY, N. Y. — The  
New York State Conservation  
Department has 36,000,000 seed-  
ling trees available for plant-  
ing by private land-owners next  
spring. The price is only \$5 per  
thousand, but there's a catch.  
Under state law the seedlings  
cannot be sold for ornamental  
or landscaping purposes and  
must be used on at least one  
acre of land.

## SPIRITS UNWILLING

DULUTH, Minn. — Police  
withheld the name of a man  
who sold them a pair of spiri-  
tualists refused to leave his  
home and then couldn't produce  
them when the squad car arrived.  
"Whenever anyone comes,  
they disappear," he said.

## PIGEON TROUBLE

NEW BRITAIN, Conn. —  
Mrs. Elaine Gegenheimer was  
cleared of charges of violating  
a watering ban during a  
drought when she said that  
using a hose was the only way  
she could keep her windows  
clean. Pigeons, she explained,

## Giant Machine Can Level Forests

LONGVIEW, Tex. — A  
Longview firm has built one of  
the most destructive machines  
ever to leave an engineer's  
drawing board.

The electric tree crusher of R.  
G. LeTourneau Inc. rips huge  
trees "up by the roots, slaps  
them to the ground, then literally  
smashes them into splinters.  
The machine, costing in excess  
of \$190,000 weighs more than  
280,000 pounds and can clear an  
acre of land every 15 minutes.  
It has wrecked giant oaks 12  
feet around without straining.  
The firm believes the machine  
can effectively boost economic  
conditions and living standards  
in dozens of jungle-ridden  
countries.

"It appears somewhat incon-  
gruous to be sending billions of  
dollars in food and clothing to  
people abroad, when many of  
them are living on soil far rich-  
er than ours," said R. G. Le-  
Tourneau, vice president of the  
company.

Difficulty in the past has  
been the astronomical costs in-  
volved in clearing jungle and  
semi-jungle areas.

However, LeTourneau believes  
that with the giant smasher  
millions of new acres can be  
cleared quickly and economically  
prepared for pastures, tree farm-  
ing, reservoirs or food crops.

He expects the greatest value  
of the machine to be Africa and  
South America where a single  
clearing project may involve  
100,000 acres or more.

Steam Roller Technique

This is the third tree crusher  
LeTourneau has built. Of the  
other two, one is ripping the  
right-of-way for a road through  
the jungles of Peru and the

HAIL U. S. SATELLITE LAUNCHING—Holding a mod-

**DEATH TRAIL**—Here is the 500-mile route of Charles Stark-  
weather, 19, who killed 10 persons in a shooting spree from  
Lincoln, Neb., to Douglas, Wyo. In Lincoln he killed his  
girl friend's mother, stepfather and 3-year-old half-sister;  
near Bennet, south of Lincoln, two teenagers on a date, and  
a 70-year-old farmer on whose land he had gone hunting;  
again in Lincoln, a man and wife and their maid; near  
Douglas, Wyo., a shoe salesman whose car he wanted.

Carl Fugate, 14, arrives at Douglas in the sheriff's car.

Stolen car in which Charles Starkweather was captured.

**EVIDENCE**—Chief witness against Charles Starkweather,  
who left a grisly trail of 10 dead bodies across Nebraska  
and into Wyoming, is Carl Fugate, his girl friend from  
Lincoln, Neb., who saw a chance to run to a Wyoming  
sheriff's party for refuge. (International Soundphotos)

## Redbirds Fall To Red Devils Wed.

The high flying New Concord Redbirds fell into the clutches of defeat for the second night in a row last night as the host Clinton Red Devils led at every quarter stop in downing Concord 53-40 in a surprise upset.

New Concord closed out last week by winning the county championship and recording its 20th win of the season against only two defeats. But this week the big Birds have dropped two in a row losing to Fancy Farm Monday night and the Red Devils Tuesday night.

Clinton leaped out front with a 19-7 first period lead but New Concord fought back in the second quarter to close the gap to four points, 29-25. The Redbirds were able to narrow the gap to only two points, 40-38.

New Concord caught up with the Red Devils in the final stanza and were leading 50-49 with 40 seconds left in the game. Wyatt connected on a field goal for the Red Devils to move out front 51-50 with only 35 seconds to play. Clinton added two charity tosses in the closing seconds to ice the game and hand Concord its fourth loss of the season.

Gene Rowland led all scorers with 20 points. Riley and Wyatt led Clinton with 16 and 15 points respectively.

Clinton ..... 19 29 40 53  
New Concord ..... 7 25 38 50

Clinton (53):  
Forwards: Kelly 3, Myers, Williams 7.

Center: Willoughby 10.  
Guards: Parker, D. Hendon 2, Brawner 1, Stubblefield 2, G. Hendon 10.

## Four Lions Hit In Double Figures

Four Lions hit in double figures to lead Hazel to an 89-50 triumph over Puryear, Tennessee to avenge an early season defeat last night in the Lanes.

The Hazel team moved out 20-15 in the opening quarter and never left the final out come in doubt as they rolled to victory leading at every quarter stop.

Duncan and Raspberry poured in 29 and 28 points respectively in notching the kill. Curt hit for 15 and Erwin tossed in 10.

Wheatley led the losers with 18 points. Ray added 9.

Center: Wheatley 18.  
Guards: Wade 4, Driver 2, Wilson, Olive 2, McLeroy 6.

## Jets Victors Over Purples

The North Marshall Jets successfully launched into the victory orbit at Lone Oak again last night with an 84-58 triumph over the Purple Flash.

North was out front by only one point, 15-14, at the end of the first canto but pulled away in the second period. The Jets were leading 40-21 at the halftime intermission.

Four of the North Marshall Jets were hit in the double figures. Hall and Doyle led the scoring with 22 and 21 points respectively. Harper led the losers with 24 points.

North Marshall ..... 15 40 60 84  
Lone Oak ..... 14 21 29 58

Centers: Edwards 6, Smithson 4.  
Guards: Harper 24, Weather- spoon 8, Kinsey, Brown 6, Clark.

## Immortality Will Have To Wait A Year

By BOB SALMON  
United Press Sports Writer  
BOSTON, Feb. 5 — Baseball immortality will have to wait at least another year for some of the game's greatest stars.

The nation's baseball writers announced Tuesday that no former diamond luminary had polled enough votes to join the 83 players already enshrined at Cooperstown, N. Y.

It was the fourth time in the Hall of Fame's 23-year history that no one had polled the necessary three-fourths vote and the first such occurrence since 1950.

Carey Comes Closest  
Closest to baseball's greatest honor was former Pittsburgh Pirate and Brooklyn Dodger Max Carey, one of the game's most amazing base-runners and base stealers. But Carey, now 68, only polled 136 votes, 63 shy of the 199 needed this year.

A total of 266 members of the Baseball Writers Assn. of America voted — an unusually high 80 per cent of the eligible, 10-year members. The results were announced by Hy Hurwitz of the Boston Globe, head of the writers' balloting committee.

Second highest vote — better this year was heavy-hitting outfielder Ed Roush, who played with the Cincinnati Redlegs and New York Giants in the '20s. Roush received 112 votes. Other greats who missed out included former New York Yankees pitcher Charlie (Red) Ruffing (99 votes) and the late Lewis (Hack) Wilson of the Chicago Cubs (94 votes).

Frick Rather Pleased  
If some of the former stars were disappointed, Baseball Commissioner Ford Frick wasn't. Frick said he was "rather pleased" that no one "received enough votes to the hall."

"I think this will give more prestige to those already in the hall," he said.

Only 33 players received 25 or more votes, limited to those who played between the years 1927 through 1953. A total of 145 players received at least one vote. Only 14 players polled 50 or more votes.

Yarley Near Record Mark

By UNITED PRESS  
With a little luck, George Yardley of the Detroit Pistons, the National Basketball Association's top scorer, can become the first player to score 2,000 points in a single season.

The balding, former Stanford University star pumped in 52 points Tuesday night to run his season total to 1,463 in 54 games. If he betters his game average of 27.2 by a little more than two points in the remaining 18 games Yardley can reach the 2,000 point circle.

Even if Yardley misses that figure, he is almost certain to top the previous season record of 1,849 set by Bob Pettit of the St. Louis Hawks in 1955-56.

Despite Yardley's peak performance the Pistons had all they could do to stave off the Syracuse Nationals, whom they finally downed, 118-113.

In other games, the New York Knickerbockers snapped a four-game losing streak in defeating the St. Louis Hawks, 120-116, in the highcap of a Madison Square doubleheader before 15,138 fans after the Boston Celtics routed the Cincinnati Royals, 107-87. The Philadelphia Warriors survived a Minneapolis rally to gain a 107-103 win over the Lakers in the preview to the Pistons - Nationals game at the Detroit Olympia.

## Heddon Deluxe Catalog Is Now Ready For Fishermen

Along with thawing streams, early robins, marble games, sucker fishing and sassafras tea drinking, one other sure sign that spring can't be far behind is the arrival of fishing tackle catalogs in general. Heddon's in particular.

Those folks in Dowd, Mich., put out a 76-page compendium that nearly amounts to a fisherman's bible. Besides "What's new" in fishing tackle, his catalog features a special section clearly illustrating America's 72 most popular sport fishes, gives details on how to catch them, where, world records, etc.

Also, there are several pages of fishing tips by Heddon's experts, a full-color print of the brook trout ready for framing, and a number of fisherman's features.

One lure especially caught our eye. It's called "Firetail Sonic" because the tail glows just enough to attract the fish's attention. This, according to the description, creates a "strike zone" which centers the fish's features.

## Williams May Sign Today

BOSTON, Feb. 5 — Ted Williams will meet with Boston Red Sox General Manager Joe Cronin Thursday to sign his 1958 contract, the club announced today.

Williams, who batted .388 last season to lead both major leagues, is believed to have received \$100,000 per season the last few years and is probably in for a substantial raise.

The 39-year old Williams is currently in Boston for fly-casting exhibitions at the Sportsman's Show.

Ted remains the only regular in the Red Sox outfield still unsigned. Centerfielder Jim Piersall signed Tuesday. Rightfielder Jackie Jensen signed a few days earlier.

## Czech Wins

LONDON, Feb. 5 — Czechoslovakia captured the European men's figure skating crown at Bratislava Friday night, according to a Ceteke Agency message from Prague.

## Indians Roll Over M. H. S. Tigers

By TED SYKES  
The Murray High Tigers battled hard last night but could not match the highly rated Benton Indians. Benton gained an early lead and maintained it throughout the game to down Murray, 88-57.

Benton took the opening tip and moved to a quick two point lead. Harold Hurt of Murray matched the two points and tied the game. Benton's monopoly of the backboard served to their advantage as they jumped to an eleven point lead, 15-4, with three minutes left in the game as the Stanzas ended with the Indians on top, 25-8.

Murray put on a sudden burst of scoring in the opening moments of the second quarter but their efforts fell short, however, as Benton again began to roll. Benton's successful execution of plays gave them a mounting score. Danny Roberts of Murray connected for 23 points. Also Gammel of Benton picked up 23 tallies. Murray attempted 17 free throws and made 9 as compared to Benton's 16 out of 25. Seventeen fouls were called on Murray while 11 were marked against the Indians.

Murray dropped the preceding B team game, 45-27.

## Victory Minded

# Kirksey Wins Over Crofton

Kirksey High School which recently upset favored Murray Training, returned to the win column again last night, this time a 65-62 victory over visiting Crofton from Christian County.

The Eagles used a big third stanza rally to move into the lead after having trailed for two quarters of play and by four points, 30-26, at halftime.

Kirksey scored 23 points in the third canto to move into a 49-39 advantage but their visitors fought back to close the gap in the final period and the regulation playing time expired with the score knotted at 60-60.

Crofton scored first on a fielder in the first overtime period but Kirksey's Parker retaliated in like fashion and the extra period ended deadlocked at 62-62.

The Kirksey squad flipped in three points in the second overtime while holding Crofton scoreless & notch their third win of the season.

Reeder got 17 for the victors but gave up scoring honors to Crofton guard, Suggs, with 20 points.

## Dupas And Ortega Will Fight Tonight

NORFOLK, Va., Feb. 5 — Light-weight contender Ralph Dupas is favored at 11-5 to beat welterweight contender Gaspar Ortega tonight in their TV fight at Municipal Auditorium.

The 10-rounder will be televised nationally by ABC at 10 p.m. e.s.t.

As slick, dark-haired Dupas of New Orleans tries to stretch his unbeaten string of bouts to 11, he is favored over the taller and rangier Mexican because of skill, speed and agility. Each is 26.

However, the mauler from Mexicali, Mex., has advantages of weight, reach, punch, ruggedness, aggressiveness and stamina.

Dupas, ranked third among contenders for the 135-pound title, hopes to prove tonight that he also is a contender for the 147-pound crown. Ortega is rated seventh among welterweight aspirants.

Dupas got the idea of becoming a "switch contender" for both titles last year when he upset Vince Martinez, Martinez of Paterson, N.J., will fight for the vacant welter crown the winner of an Isaac Logart-Virgil Atkins semi-final.

TODAY'S NEWS TODAY IN THE DAILY LEDGER & TIMES

## Colts Drop Third Game In A Row

Murray Training apparently bitten by the same bug of defeat that has clubbed New Concord this week, dropped its third game in a row last night. Fulham High School stopped the Colts, 62-54, in the Carr Health Building.

The Colts took a first period lead of three points, 15-12, but fell behind in the second quarter and never led again. The Black Cats were on top 29-27 at the halftime intermission and moved away in the third stanza.

Billy Rogers led all scorers with 28 points. Clark led Fulham with 19 tallies.

Fulham ..... 12 29 47 62  
Murray Training ..... 15 27 33 54

Fulham (62):

## Campanella Still In The Hospital

GLEN COVE, N. Y., Feb. 5 — Roy Campanella, who always hated hospitals, still doesn't know when he'll be discharged from Glen Cove Community Hospital.

The veteran Los Angeles Dodgers' catcher started his second week of confinement Tuesday in "good spirits" but his condition remained "essentially unchanged."

Campanella suffered a broken neck in an auto accident Jan. 28. His temperature is "slightly elevated," a hospital spokesman said Tuesday night and "there has been no further improvement in his sense of feeling."

Club News  
ActivitiesFunniest Experience  
Topic At Meet Of  
Toastmistress Club

The "funniest experience" I ever had was the subject of the two minute table topics at the Toastmistress Club Monday evening. The club meets each first and third Monday night at the Woman's Club House at 6 o'clock and adjourned promptly at 7:30. Mrs. Jo Nell Rayburn acted as toastmistress and topicmistress. Mrs. Albert Tracy, president, conducted the business.

Mrs. James Rudy Albritten speaking on the objectives, explained that the Toastmistress club is designed to help one speak and lead. It provides an opportunity for personal development through training and practice in all techniques of oral expression and parliamentary procedure. Members learn to preside at meetings, formulate policies and write bylaws, keep minutes, make reports and write publicity, she continued.

Mrs. John Pasco spoke on parliamentary procedure and stated that there is confusion concerning the common practice of moving, "that nominations cease and that we elect by acclamation." This confusion arises from the fact that there are several things wrong with this motion, she said.

Mrs. Garnet Jones, lexicologist, explained the variation in definitions of "utter, iterate and reiterate" and discussed the word "pseudonym."

Participating in the table topics were Mrs. J. I. Hoack, Mrs. Harry Sparks, Mrs. Tracy, Mrs. Pasco, Mrs. Albritten, Mrs. Jones, Mrs. Rayburn, Miss Dorothy Ivan, Mrs. William Nall, Mrs. Edwin Larson, Mrs. George Hart, Mrs. J. A. Outland, and Miss Lillian Tate.

Serving as leaders at the third Monday night meeting will be Mrs. C. C. Lowery, evaluator, Mrs. Larson, Mrs. Hoack, Mrs. Dorothy Ivan, toastmistress, Mrs. Pasco, topicmistress, Mrs. Hart, parliamentarian, and Mrs. Rayburn, toastmistress.

Those interested in participating in this club should talk with any of the members, for information.

The South Murray Homemakers Club will meet in the home of Mrs. Sam Knight on South 18th Street at 1:30 in the afternoon. The lesson will be on Growing Roses. Mrs. Bob Bazzell will assist Mrs. Knight.

**Thursday, February 6**  
Group III of the First Christian Church's CWF will meet in the church parlor at 8 p.m. Mrs. Frank Doble is hostess and Mrs. Gerhard Megow is in charge of the program.

The Baptist Association of the WMU will meet for a mission study institute in Benton at 10 o'clock in the morning. All members are urged to be present.

Faxon Mothers Club  
To Meet Wednesday  
Afternoon at School

The regular meeting of the Faxon Mother's Club will be held Wednesday afternoon, February 5 at 1:30 in the lunchroom of the school.

All mothers are urged to attend. The Grade Basketball Tournament will be held Thursday night, February 6 beginning at 6:30. Admission will be 25c. Sandwiches, pie, popcorn, candy, cold drinks and coffee will be served in the lunchroom by the club.

Dr. Don Hunter Is  
Guest Speaker At  
Cora Graves Circle

Dr. Don Hunter spoke to a meeting of the Cora Graves Circle of the College Presbyterian Church, Monday evening, February 3 at 8 o'clock in the home of Mrs. Ed Brunner. He spoke on his impressions of Japan.

Mrs. Edwin Larson presented a devotional bible study on "Meet Dr. Luke." The business meeting was conducted by Mrs. Alfred Lindsay, president.

Two guests were present at the meeting. They were Mrs. Edwin Steyer and Mrs. Sidney Moss.

Refreshments were served to the twelve members by the hostess, Mrs. Brunner.

Mrs. Castle Parker  
Program Chairman  
Baptist Circle Meet

Mrs. Castle Parker was program chairman on the topic "Door Posts and Gates" at the meeting of the Little Mink Circle of the First Baptist Church.

The meeting was held in the home of Mrs. Porter Hilland, Monday evening, February 3 at 7:30.

Mrs. Joe Williams presented the devotional. Mrs. James Ward, president, presided at the business meeting.

Refreshments were served to 18 members by Mrs. Hilland and Mrs. Thomas Hagan, co-hostess.

The College Presbyterian Church will have a Family Night supper at the church at 6:30 in the evening. Capt. John T. Bryant, ROTC, will speak on the Presbyterian mission work in Iran.

**Group IV CWF**, First Christian Church will meet at 9:30 in the morning at the home of Mrs. Robert Hahn, Olive Street. Mrs. Ed Duiguid will conduct the program. Co-hostess will be Mrs. H. J. Bryan.

The Jessie Houston Service Club will meet at 7:30 in the evening at the Dairy Ann. Mrs. Hazel Tutt will be the hostess.

The Town and Country Homemakers Club will meet at seven o'clock in the evening in the home of Mrs. Stubb Wilson.

The Garden Department of the Murray Women's Club will meet at 2:30 in the afternoon at the club house. Theme of the program will be "Arrangements."

Taking charge of the program will be Mrs. M. O. Wraether, Mrs. Humphrey Key, Mrs. B. C. Harris and Mrs. Gordon Moody. Hostesses will be Mesdames Fred Gingles, B. J. Hoffman, Carl Lockhart, J. E. Littleton, Eaf Huie, and Maurice Crass.

**Friday, February 7**  
The Christian Women's Fellowship of the First Christian Church will meet at 2:30 in the church parlor for a general meeting. Mrs. C. L. Johnson, state secretary from Lexington, will be guest speaker.

**Saturday, February 8**  
The Captain Wendell Oury chapter of the DAR will meet at 2:30 in the afternoon in the home of Mrs. Wells Purdon, North 10th Street. Mrs. Julian Evans is co-hostess. All members are urged to attend the meeting.

**Monday, February 10**  
The Sigma Department of the Murray Women's Club will have its annual Sweetheart Dinner for the husbands at the club house. Guest speaker will be Mr. Holmes Ellis. Hostesses will be Mesdames Maurice Crass, Jr., O. B. Boone, Jr., Gene Landolt, Tommy D. Taylor, Allen Rose, and Harry Wayne. The meeting will begin at 7:00.

**Tuesday, February 11**  
The Captain Wendell Oury chapter of the DAR will meet in the home of Mrs. James E. Duiguid, North 8th Street, at 10:30 a.m. Mrs. Charles Mason Baker is in charge of the program.

Murray Star Chapter No. 433 OES will meet at 7:30 in the evening at the Lodge Hall.

The five WMU circles of the First Baptist Church will meet at 2:30 in the afternoon in the following homes: Circle I with Mrs. Jack Kennedy, North 8th St.; Circle II with Mrs. O. C. Wells, 306 South 5th St.; Circle III with Mrs. Clifton Key, 110 North 14th St.; Circle IV with Mrs. L. L. Downs; Circle V at the Baptist Mission.

**Wednesday, February 12**  
The Business Guild of the First Christian Church will meet in the home of Mrs. J. E. Littleton, South 8th Street, at 7:30 in the evening. Mrs. Cleo Gillis Hester will be co-hostess.

The Wesleyan Circle of the First Christian Church will meet in the home of Mrs. John Ivan, 306 North 10th Street at 7:30 in the evening. Mrs. Ed Griffin is co-hostess.

The West Hazel Homemakers Club will meet in the home of Mrs. Lilburn Paschal to study "Growing Roses."

**WHERE?**  
DAYTON, Ohio — An excited woman called the police to report an accident. Asked where it was, she said, "I don't have time to talk about it now. I'll tell you when they get here." Then she hung up.

**So?**  
COLUMBUS, Ohio — State Auditor James A. Rhodes said his office wrote 3,306,152 checks last year, enough to extend 430 miles, or from Cincinnati to Buffalo, if laid end to end.

Sweetheart Dinner  
For Husbands To Be  
Given By Sigmas

A sweetheart dinner for husbands will be given Monday evening, February 10 at 7:00 at the Murray Women's Club by the Sigma Department of the club. Guest speaker will be Mayor Holmes Ellis.

Reservations for the dinner must be in by Thursday evening, February 6. All members must call Mrs. Maurice Crass, Jr. Phone 898 in order to reserve a place.

Hostess for the dinner party will be Mesdames Crass, O. B. Boone, Jr., Gene Landolt, Tommy D. Taylor, Allen Rose, and Harry Wayne.

## PERSONALS

The 1957 class of the Murray Training School held the first of its annual reunion suppers at Fickler's South Side restaurant recently. Twenty-three students attended.

Mr. and Mrs. Garland Young, both of Detroit, Mich., are visiting relatives in Kentucky enroute to Florida for a vacation.

Mr. and Mrs. Leon McGary of Memphis, Tenn., spent the weekend with relatives in the Mayfield Hospital.

Miss Bobbie Jo Watson is visiting relatives in Detroit, Mich.

Mrs. Mattie Jones has returned home from the Memphis hospital and is reported doing fine.

**UNCONCERNED** — Gina Lollobrigida, Italian film star, seems quite unconcerned over a French newspaper's comments as she arrives in New York from Rome for the premiere of her latest film.

**NOT FLYING SAUCERS, BUT "SPOKENIKS"**

Lorry Pastick dressed to repel flying saucers, but encountered only "The Six Wheels of Chevrolet" in this unusual illustration of the swing toward distinction in automotive design. Each steering wheel pictured above is exclusive to a specific vehicle in the Chevrolet line. Represented are the Corvette, Impala, Bel Air, Buick, DeSoto, Oldsmobile and a light truck.

**TWINS BUCK ODDS**  
MENASHA, Wis. — The twin boy and girl born to the Dalton Schoenings are pretty special. They are the third set of boy-girl twins in the Schoening family, something statisticians say happens only once in seven million times.

**CLASSROOM FIRST AID**  
CHICAGO — Army SSG George C. De Mario has written to his parents from Japan that his night class in judo requires a lot of homework. The homework, he said, consists of giving his bumps and bruises first aid.

**CRASHES KILL 75**  
WIESBADEN, Germany — Seventy-five U. S. airmen were killed in aircraft crashes in Europe and North Africa last year, air force officials reported. They said 38 of the victims were pilots and 37 were crewmen. Seventy-eight aircraft were destroyed.

Building Of  
Homes Best  
Barometer

By ELMER C. WALZER  
United Press Staff Editor  
NEW YORK — The Stock Exchange firm of Green, Ellis & Anderson regards the home building industry as a barometer of business.

Right now says Milton MacNamee, analyst for the firm, housing is one of the few areas bucking the trend — and it may be signalling a broad recovery by industry.

MacNamee holds that housing often has shown strength when the economy has been in the doldrums — and has also been known to slump when everything else seemed right with the world.

He cites the situation of the Twenties when the building boom reached its zenith in 1925 and then crashed, foreshadowing the depression of the Thirties.

As a much more recent example, he notes the decline from the 1955 rate of 1.5 million housing starts set early that year and carried over to 1957 — a decline that foreshadowed the current recession.

"The economy," he says, "probably won't pickup a full head of steam before the fourth quarter of this year (if then). So producers of building supplies will have to wait a while to recapture fully their peak earnings of 1954-55."

"But there's no mistaking their better times. The pickup begun in October last year is gathering momentum. Predictions agree on a total of 1.1 million housing starts for the year — up seven per cent over 1957 and not bad for a starter."

He estimates total private construction for 1958 at 35 billion dollars. Except for housing starts, he sees the biggest shot in the arm will come from government. This will include public outlays for schools and roads.

Add everything up, says MacNamee, and the public and private building total will run to some 50 billion dollars.

Housing will be the biggest beneficiary. Added to new housing starts will be about 18 billion dollars in maintenance and repair work.

Also, he notes there are missile sites to be built — "They're huge and call for many of the materials going into residential home construction."

The firm favors the gypsum companies rather than plywood companies or makers of asphalt products because the gypsum group has come out of its recent retrenchment with earnings pretty much stable and dividends secure.

**CRASHES KILL 75**  
WIESBADEN, Germany — Seventy-five U. S. airmen were killed in aircraft crashes in Europe and North Africa last year, air force officials reported. They said 38 of the victims were pilots and 37 were crewmen. Seventy-eight aircraft were destroyed.

## Film Shop

By RON BURTON  
United Press Staff Correspondent

**HOLLYWOOD** — Singing is nothing more than acting with melodic dialogue, according to Julie London.

And that's why the pretty singer believes that the fields of singing and acting are so related that it's the most natural thing in the world for a singer to become an actor or for an actor to sing.

"Look at all the top singers who have done so well in the dramatic field," she said. "There's Bing Crosby, Jane Powell, Debbie Reynolds — to name just a few."

"And it's worked the other way in so many cases. I wasn't surprised to hear Jeff Chandler sing so well. It went along with this theory which, I know, is hardly original with me."

Miss London, who first was an actress, then sold so many records that their sales haven't been totaled yet and now is back before the cameras, is quite willing to give advice on the subject.

**A Non-singing Role**  
"If you want to be a singer, be an actor," she said. "That's how I look at it. There's an inseparable relationship between the two. When a singer sells a song, he's not just being an actor."

**Monkey Business**  
DETROIT — Mrs. Barbara Lee Coleman said she was driving along near a bridge on the outskirts of the city when her pet ring-tailed monkey started to bite her. She lost control of her car and crashed, suffering minor injuries. The monkey was unhurt.

Cape Cod got its name 18 years before the Pilgrims landed at Plymouth. Bartholomew Gasnold, an English explorer who sailed around the area in 1602, christened it Cape Cod because it abounded in fish.

## Country Club Luxury In This California Contemporary Home

The rich endowments toward greater home beauty and livability contributed by the strong "California" influence are today utilized across the nation. Numbered among these are the long, low silhouette; floor-to-ceiling glass areas which interrelate the exterior and interior; and the use of color in combination with balanced material-texture variation.

Designer Don Scholz, pioneer in the "California" trend has in this house captured the best elements among the Western innovations. And what's more it's built into a structure which through straight in-line construction and economical use of space, is within reach of the modest budget.

Among outstanding features in this 1,344 sq. ft. home are: (1) three ample bedrooms. (Also available in deluxe 4 bedroom model with plenty of storage); (2) a compartmented family bath just a step away from each of the bedrooms; (3) three areas for dining to suit the occasion — a separate dining room for more formal meals, a family dining area in the efficient "in-line" kitchen, and a covered patio for pleasant dining on warm summer days; (4) a view garage; and (5) a full-size storage room or workshop with direct access to the outdoors in the basementless version of the house.

To obtain further free information on this house, write to Don Scholz Design Associates, Dept. 107, 2001 N. Westwood, Toledo 7, Ohio.

tion you should attach to your tax return a statement showing the name and address, if known, of the debtor; the date the debt was incurred; the date the debt became due; what the debt was for; what efforts you have made to collect the debt; and why you believe the debt to be worthless.

If you are in business or practicing your profession for your own account, then your business bad debts are deducted together with your other business costs, on separate Schedule C of the tax return.

If your bad debt is a personal debt, you deduct it on separate Schedule D by entering the bad debt as a short-term capital loss. This deduction, taken with any other capital gains and losses you may have had in 1957, is limited to \$1,000 per year.

If your bad debt and other capital losses are in excess of \$1,000, and you are married, then you should consider filing separate returns. Both you and your wife can take \$1,000. Any excess can be carried over into the next succeeding five years.

You can deduct up to \$1,000 per year for the next five years, if your loss amounts to that much. You can take it all in any year that you can deduct it from your capital gains.

# Marathon Tea Party Underway

By GAY PAULEY  
United Press Staff Correspondent  
NEW YORK — A marathon tea party began in our town today.

The 55th annual tea-tasting session is on, with a group of seven experts feeling, sniffing and "swishing." This'll go on the rest of the week, with more than 100 varieties of tea, selected at random from bonded warehouses, getting the once-over.

Tea-tasting is serious business. The experts will set the standards for the quality of tea which may be imported in the 12 months beginning May 1.

This whole process dates back to 1897, the Tea Council of the U.S.A. reports. That year, American merchants, fed up with getting a lot of non-tea among the tea leaves, set up their own testing panel. That package could be expensive, when you consider that it takes 10,000 leaves to make a pound of tea as we buy it today.

When the Pure Food and Drug Act was passed in 1903, a government expert was added to the industry panel. He also samples the year-round, to make sure that new shipments meet the standards this week.

Held Each Year  
This year's panel consists of Albert Grillo and Alexander Grillo, both of New York; Edward Branten and Thomas Moss, San Francisco; Phillip Hellyer, Chicago; Angus W. McAdam, Boston; and Robert H. Dick, the federal examiner.

The tests are held each year in the "Tea Room," a plain ordinary office at the downtown Manhattan headquarters of the Food and Drug Administration.

Tasters seat themselves at a circular, revolving table. Before them are carefully weighed samples in handless, white china cups.

Boiling water from big steaming kettles nearby is poured over the leaves. The experts watch the leaves unfold, observe the color of the tea, sniff the aroma and, after the stuff has brewed exactly five minutes, lift the leaves from the cup and feel them. Now comes the "swishing" as they dip the brew into their mouths from outside team spoons.

No swallowing, however. The tasters "park" the brew in a three-foot, funnel-like container once commonly known as a gaboon.

Live Wine Tasting  
"Tea-tasting is a little like wine-tasting," said panelist Grillo, who's been sipping since 1924. But since the tea is only "swished," and not downed, there is no need for clearing the palate between samples.

Tea comes in thousands of varieties, depending on where it was grown, at what altitude and in what climate. An experienced taster can identify as many as 3,000 types.

The council happily reported but consumption of the brew is increasing. Last year, more than 107 million pounds came in from India, Ceylon and Indonesia.

NOT INFLUENCED, THEY SAY — Principals in the House Interstate and Foreign Commerce committee's investigation of the Federal Communications Commission discuss their appearances before the committee during a luncheon break in the hearings in Washington. In the upper picture, FCC Chairman John Doerflinger (right) chats with Administrative Assistant Joseph M. Strick (left) while below FCC commissioners (l. to r.) Rosel B. Hyde, Frederick W. Ford and Robert T. Bartley discuss the case. Gift of testimony was that while commissioners received gifts and travel expenses from TV-Radio, such gifts did not influence their judgment.

THE "DO'S" AND "DON'TS" FOR SOWING SEEDS INDOORS.

Attractive planters, used for sowing garden seed indoors, add a touch of color to your home.

Patience is a virtue we don't all possess. And if the cold winter months seem to go on forever, take a look at the new seed catalogues and cheer up. You'll want to get right in and garden. Fortunately, keeping a few basic conditions in mind, you can start seeds indoors. They are:

1. Starting seeds indoors has been simplified with the development of special containers made of metal, plastic and waterproof paper. You'll find them in seed houses, garden centers and even your local variety stores. Some of these are sub-irrigated, which takes the guess-work out of watering. Also many of them are very good looking and will add a touch of color in your home.

2. Vermiculite and sphagnum moss are excellent for starting seeds in. They are disease-free and easy to use. Soluble plant foods are ideal for giving young seedlings strength and stamina.

3. Timing indoor sowing of seeds is important, for within four weeks or so after planting, young seedlings will be ready to be transplanted to other boxes, cold frames or a protected place outdoors. So avoid the mistake of sowing your seeds too soon. Also, be prepared to move your seedlings at the proper time.

4. Seeds need warmth to germinate, but they don't need light. Many people cover seed boxes with newspaper until the seeds germinate. However, just as soon as the seedlings are up, give them full light at a warm window. Keep the containers where temperatures run from 60 to 70 degrees until the seeds sprout. After that 55 to 65 degrees is best.

5. Good health for seedlings depends on three things: temperature control, adequate light and proper watering. On bright sunny days, temperatures next to the window may rise too high in a warm room. This calls for a shift to a cooler room or a little room ventilation to keep the seedlings from becoming soft. Seedlings must have full sunlight to keep them stocky and strong. In weak light, they stretch and get spindly.

# Wall Street Elated Over U.S. Satellite

By ELMER C. WALZER  
United Press Financial Editor

NEW YORK — Wall Street elated over the successful firing into orbit of the first United States satellite, is digging into the missile field for clues on the future of this fast growing industry.

Right now the missile industry is small, but it has had a remarkable growth and the future is for much more growth. The trouble is the market men see it is that so many companies are involved, and none in the missile business alone.

The U.S. satellite, called the Explorer popularly and the Alpha by scientists, was sent aloft by the Jupiter-C missile which was a combination of Jupiter and Redstone missiles, of which Chrysler Corp. is the prime contractor. The Martin Company's Vanguard is being set up for another try at shooting its satellite.

If that one gets into orbit, the scientists will call it Beta, the second letter of the Greek alphabet. Then will come Gamma. So Wall Street is studying the whole Greek alphabet of 24 letters.

After Gamma comes Delta and then Epsilon, Zeta, Eta, Theta, Iota, Kappa, Lambda, Mu, Nu, Xi, Omicron, Pi, Rho, Sigma, Tau, Upsilon, Phi, Chi, Psi, and Omega. When these are used up there can be an infinite number of combinations.

If the man-made satellites are kept to the Greek alphabet formula, the naming system will be much more consistent than that used for missiles.

These names dig into mythology and many other things. For instance, Jupiter is the top Roman God, the equivalent of the Greek god Zeus. It's also the largest planet, taking 11 years to revolve around the sun.

Then there are such missiles as Titan, Atlas, Nike, Atlas, Hercules, and Ajax, named for Greek mythological persons. There are some other astronomical names in addition to Jupiter such as Polaris (north star), Regulus, and Meteor.

Then there's fiction for Snark (combination of snake and shark) Norse mythology for Thor, the god of thunder and Indian lore for Zuni of the Pueblo tribes of New Mexico.

Then there are birds — Falcon, Dove, Sparrow, Blue goose, Hawk and Quail, dogs — Bull-Pup and Terrier, and such non-classifiable names as Sidewinder, Bomarc, Dar, Rascal, Honest John, Little John, Ding-Dong, Corporal and Matador.

Dr. Simon D. Hutter, notes that the missile industry has grown 10,000 per cent from \$25 million in 1951 to \$2.5 billion in 1958 with prospects this figure will double or triple in the next five years.

NEW YORK — World House Galleries is featuring a selection from the Feigen Collection. The major part of the show consists of paintings, drawings and sculpture by the German artist Ernst Ludwig Kirchner (1880-1935).

Kirchner was a superb draftsman. He could conjure up a few lines the illusion of plastic volumes.

As a painter he is usually classified as an expressionist. His color is transparent. His shadows might be red, a face blue — but his role is still descriptive. Like a good disguise that conceals the mask's identity but reveals his character.

But it is his engravings that Kirchner achieved his greatest expressionistic feat. Here his lines are not only evocative of plastic shapes, they have their own personal mood ranging from the calm to the agitated, from the sensitive to the cruel.

Colors, too, go beyond the illustration of appearances or mental states. The dark blue that spreads across the right upper corner of the engraving and covers the forehead of the man portrayed is not taken from everyday reality. It is the material symbol of the disturbance that is taking hold of the hero's mind. It is not the reflection of a perception but the echo of a poetic vision that the artist has had. It is in his engravings that Kirchner ventured into new directions of psychological representation. It is in this field that he exerted his deep and lasting effect on 20th century German art.

At the Hermitage — Adler Gallery, Adler Blais has on view "An Exhibition of Twenty Paintings Interpreting 'The Threepenny Opera'."

IT'S A BOY  
NORRIS CITY, Ill. — A resident here awakened by a low-flying airplane saw leafed and "Sinker" had a boy.

Henry Singer, high school agriculture teacher, decided not this approach rather than passing out cigars.

# Earth Worm Remembers

By DELOS SMITH  
United Press Science Editor

NEW YORK — A fascinating fact from the lesser known vineyards of science is that even an earth worm can learn things and doesn't forget after he's lost his head. He grows a new head and continues to profit from his learning.

Science also knows why hens lay so many eggs which is an astonishing thing when you keep in mind that two to a dozen in spring time is all most birds bother to lay. The hen lays as many as 200 a season because people systematically rob her nest. By the technique of nest-robbing, a scientist caused a woodpecker to lay 71 eggs in 73 days.

On the other hand, an aphid lay eggs only in the fall. These eggs "winter" add in the warmth of the spring sun hatch aphids. One "winter" egg could give rise in one summer to so many aphids their total weight would equal the weight of the world.

—provided there was an unlimited food supply for aphids and their natural enemies left them alone.

Has Natural Enemies  
But insects have natural enemies other than other insects and people. Houseflies get at the feet, for example, and there is a "staph" infection which usually kills about half the flies who pick up the bug. Insects are knocked off by viruses as well as by bacteria.

So far as science knows, it has never rained cats and dogs, but it has rained fish and frogs. Small herding bounced down on Liverpool. These creatures had been picked up at sea and from marshland by waterpumps.

Not all woods float in water, many sink to the bottom. The wood of the quebracho or "axe-breaker" tree of Argentina weighs 87 pounds per cubic foot. Fresh water weighs 62.5 pounds per cubic foot. To float, an object must displace its own weight in water, and may object which weighs more than water, cubic foot to cubic foot, can't do it.

These answers to out-of-the-way scientific questions are taken from a new book, "Science in Everyday Things" Harper, New York by William C. Vergara, an electrical engineer but a scientific question-answer man by hobby. The book is Q and A from start to finish. The questions range over most of the sciences but not one of the several hundred is removed from the common experiences of people.

Some Wood Sinks

# Navy...

(Continued from Page One)  
The range safety officer destroyed the rocket.

The failure of the Vanguard to its test satellite was flashed around the world.

WIRE SNIPPERS FINED  
CLARION, Iowa — Donald Barnholt, 21, and Gerald McKnight, 31, were charged with grand larceny for clipping 404 pounds of wire from poles of an abandoned electric power line.

Ostriches never bury their heads in the sand or anything else. As birds go, the ostrich is not stupid but smart. The males will decoy enemies away from nests by staggering off and then collapsing as though dying. The males run over three to four females who lay their eggs in the same nest. At night, the male sits on the eggs.

Some Wood Sinks  
Not all woods float in water, many sink to the bottom. The wood of the quebracho or "axe-breaker" tree of Argentina weighs 87 pounds per cubic foot. Fresh water weighs 62.5 pounds per cubic foot. These answers to out-of-the-way scientific questions are taken from a new book, "Science in Everyday Things" Harper, New York by William C. Vergara, an electrical engineer but a scientific question-answer man by hobby. The book is Q and A from start to finish. The questions range over most of the sciences but not one of the several hundred is removed from the common experiences of people.

HOLLYWOOD — Robert Ryan's makeup for the film version of Erskine Caldwell's "God's Little Acre" takes three and one-half hours to apply. After that there are frequent and periodic adjustments which are made throughout the shooting day.

The head man for these makeup problems is Maurice Seiderman. He learned right away that his task — making a prime — of-life specimen like Ryan into a gray-haired, middle-aged man — would not be easy.

"It sure isn't," he said. "I have to make him look as if he's never heard of Hollywood. This is no routine job at all. It's the roughest job of the Georgia farm family."

"Those people live close to the soil. They have to be real and not just actors who are made up. It's no trick to draw lines on a person's face, but that's not a realistic makeup job. Everything must be subtle and invisible. A good job is the sum of small numbers which add to a total effect."

A Tough Job  
Seiderman went at his job by personal and photographic examination of Ryan's face. Then he began deepening each wrinkle, each line, in such a way that he figured how Ryan would look at the age of the film's character. This was the basis for the make-up version of Ryan's face which will be seen in the movie for United Artists.

In addition to lines and wrinkles, facial muscles and whiskers also figured in the makeup production. After lines were made on his

face, small shadows were drawn to create the sagging facial muscles. Then the stubble beard and hair were treated, several hairs at a time because the character would not be completely gray at his age. This is why some of the stubble heard was treated and some of it untouched, and the hair was dyed completely.

"It was a rough job," Seiderman said. "The sort of thing that will give you gray hair."

# MOVIES AGAIN—Juan P. Peron looks not at all downcast in his Jaraguá hotel quarters in Ciudad Trujillo, Dominican Republic, where he went from Cardona after overthrow of the Jimenez dictatorship in Venezuela. This is his fourth change of address since he was tossed out in Argentina in September of 1955. (International)

# NINE MORE DAYS TO OUR CLOSING OUT SALE

We have regrouped and repriced our racks and added many new dresses, suits and coats to the display. Time limit! Everything must go in the limited time left.

GIVE AWAY PRICES! CHANCE OF A LIFE-TIME TO SAVE!  
COME IN NOW! TOMORROW MAY BE TOO LATE!

CLOSE-OUT 1 RACK LADIES' DRESSES  
Crepes - Cottons - Etc.  
Values to \$19.95  
FINAL PRICE \$1.00  
Out They Go!

CLOSE-OUT DRESSES  
Cottons - Acetates - Etc.  
Values To \$24.95  
Give Away Price! \$1.88
